### Part Two pictures

Xara as she appears at Ben's party back on Earth. His first meeting with a Supremis. Age 28, genetics half Velorian, half Galen.

Ann when she first meets Ben, proving to him that she's really a Protector despite her raven hair. Age 297, genetics Arion, enhanced by Aphrod'ite on Velor.

Myra after she's just rescued the two children from the construction accident. She looks just like an Old One, her genetics identical to the first generation of Arion Primes. Age 16.

Klara while tearing open the Supersteel steel vault at the Bank of Sanctuary. A modern day Robin Hood. Age 23, genetics Kryp'terran.

Klara inside her temple on her island, pretending to be the goddess of her own little religion. Arrogance personified.

## Part Two pictures

Paris, as Ben first sees her, sitting outside her hut in the surfing village. Simple, unaffected and beautiful. Age 18, genetics Kryp'terran.

Paris as she steps out of the bonfire to talk with Ben and Tommy.

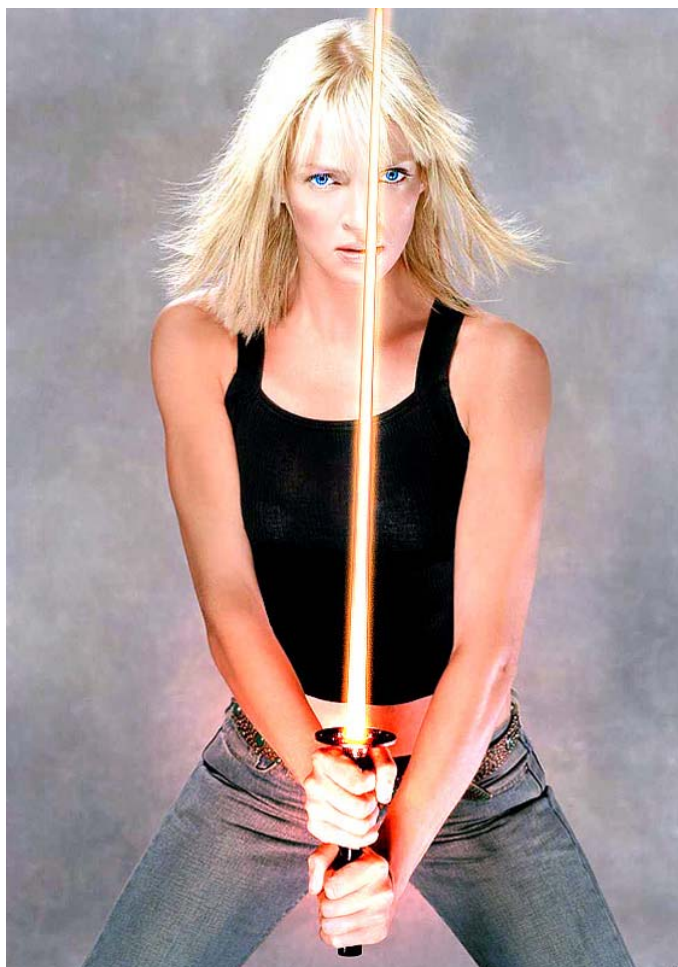

Aayla as she lands back on the roadway after hoisting the bridge span into place. Ben's first sight of her. Age 29, genetics Kryp'terran, but favoring her Galen half.

Aayla as she challenges Ben while working out with her energy sword.

Aayla as she and Ben sit in the bar after dinner, talking about their lives.

Aayla after transforming herself into a Velorian Protector. In this form, her genetics are purely Velorian, with only portions of her brainstem remaining Galen so that she can change back.
